

Installatron - WordPressi näitel

Installatron on cPaneli rakendus, mille abil on võimalik **paari nupu** vajutusega paigaldada populaarseid veebirakendusi, näiteks WordPress, Joomla, MediaWiki jne. Installatron lihtsustab veebilehe haldajal veebirakenduste paigaldamist, haldust ja uuendamist.

WordPressi paigaldamine Installatroniga

1. Mine oma kasutajakontoga [cPaneli avalehele](#). Otsi üles veebirakenduste lõik ehk *web applications* (vaikimisi kõige all). Vajuta nupul *view more*.
2. Seejärel tuleb suur nimekiri veebirakendustest, mida on võimaldada paigaldada. Otsime üles sisuhaldussüsteemi osa ehk *Apps for Content Management* ja vajuta WordPressi ikoonil.
3. Siis avaneb WordPressi rakenduse tutvustav osa. Seega vajuta nupul *install this application*.
4. Nüüd on võimalus seadistada WordPressi seaded: veebilehe asukoht, versioon, WordPressi üldseaded (administraatori kasutajanimi ja parool). Kui valikud valitud, siis vajuta nupul *Install*.
5. Algab WordPressi paigaldus. Kui on paigaldatud, kuvatakse väikene ülevaade paigaldatud rakendusest.
6. Sinu veebilehel ongi nüüd WordPress.
7. Veebirakenduste lõiku ilmub uus paigaldatud rakendus ehk Wordpress, mille alt on võimalik ka üldseadeid muuta.

Juhend koos piltidega

1. Mine oma kasutajakontoga [cPaneli avalehele](#). Otsi üles veebirakenduste lõik ehk *web applications* (vaikimisi kõige all). Vajuta nupul *view more*.

2. Seejärel tuleb suur nimekiri veebirakendustest, mida on võimaldada paigaldada. Otsime üles sisuhaldussüsteemi osa ehk *Apps for Content Management* ja vajuta WordPressi ikoonil.

Apps for Content Management

Content Management Systems (CMS) are applications designed to manage dynamic content for websites.

All CMS applications have the ability to manage news or blogs and all include a templating system that allows the appearance/style of web pages to be controlled. The more advanced applications can include a near endless list of additional features, including: categories; commenting; user logins; polls; statistics; file managers; FAQ managers; and so on.

CMS applications generally fit into the following loose categories: Blogs (also known as weblogs), CMSs, Portals (modular features that can be added into a standard three-column page layout), and Frameworks (do-it-yourself systems).

 WordPress blog	 Drupal cms	 Joomla portal	 b2evolution blog	 Dotclear blog	 Geeklog blog	 LifeType blog	 PivotX blog
 Serendipity blog	 Textpattern blog	 CMS Made Simple cms	 concrete5 cms	 Contao cms	 GetSimple cms	 ImpressPages cms	 liveSite cms

3. Siis avaneb WordPressi rakenduse tutvustav osa. Seega vajuta nupul *install this application*.

4. Nüüd on võimalus seadistada WordPressi seaded: veebilehe asukoht, versioon, WordPressi üldseaded (administraatori kasutajanimi ja parool). Kui valikud valitud, siis vajuta nupul *Install*.

Location

Please select a location to install WordPress.

The location is a combination of a domain and a directory that together determine where the files will be installed and where the application will be viewed in a web browser after installation.

Domain

Directory (Optional)

The domain and directory selected above represent a URL (a web page link) and also a physical path on the server's hard drive, both of which are shown here:

`http://www.sinuveebileht.ut.ee/`

`/webpages/sinuveebileht/public_html/`

Version

Select the version of WordPress to install.

Version

Language

The end user license agreement outlines how the software may be used, and can include rules on commercial use, modification, and distribution, along with information on pay-for versions of the application.

WordPress 4.4.1 EULA

- ☒ I accept the license agreement
- ☐ I do not accept the license agreement

Automatically update the installed application immediately as new versions become available.

Automatic Update

- ☐ Do not automatically update.
- ☒ Update to new **minor versions** and **security releases**.
- ☐ Update to any new version.

Updates execute between midnight and 6AM server time and email notifications are sent with the result of each update.

WordPress Plugin Automatic Update

- ☒ Do not automatically update WordPress plugins.
- ☐ Update WordPress plugins as new versions become available.

After 14 days the created backup automatically expires and is deleted to free disk space. However, prior to expiration the created backup can be retained by selecting the option from your "My Backups" tab.

WordPress Theme Automatic Update

- ☒ Do not automatically update WordPress themes.
- ☐ Update WordPress themes as new versions become available.

Automatic Update Backup

- ☒ Create a backup and automatically restore the backup if the update fails.
- ☐ Do not create a backup.

Settings

These settings allow you to customize and personalize this installed application.

The values set can be modified later within Installatron or within the installed application.
