**News**

**Password manager applications**

Joonas Masing 30.05.23

It is recommended to keep data for logging into the University of Tartu systems in a password manager. Password managers are secure software applications that can be used to manage and securely store passwords...

**Information security knowledge**

Joonas Masing 14.03.23

We invite all employees of the University of Tartu to check their information security knowledge with cyber hygiene tests in the online environment. The aim of the tests is to highlight the main risks of everyday computer use through real-life examples and...

**Digital cleanup guidelines**

Imre Lall 05.02.23

Digital junk is the stuff that unknowingly but surely accumulates on our computers. Over time, various useless programs, documents and many other unwanted things appear in the machine. Therefore, using the computer becomes more cumbersome and...
