

# OpenVPN - Mac OS X

## VPN ühenduse seadistamine

1. Avage aadress <https://tunnel.ut.ee>
2. Sisestage lahtrisse *Username* oma Tartu Ülikooli kasutajatunnus.
3. Sisestage lahtrisse *Password* oma Tartu Ülikooli parool.

4. Vajuta nupule **Go**.
5. Vajuta lingile *OpenVPN Connect for Mac OS X*, et laadida arvutisse VPN ühenduse paigaldamiseks mõeldud pakett.
6. Käivita arvutisse laetud paigalduspakett ja teosta paigaldus.

## VPN ühenduse loomine

1. Ühenduse loomiseks peab arvutisse olema paigaldatud OpenVPN Connect tarkvara.
2. Ühenduse loomiseks käivitage OpenVPN tarkvara, kella juurde ilmub vastav ikoon.

## Setting up the VPN connection

1. Go to <https://tunnel.ut.ee>
2. Enter the username of your University of Tartu account in the Username field.
3. Enter the password associated with your account in the *Password* field.

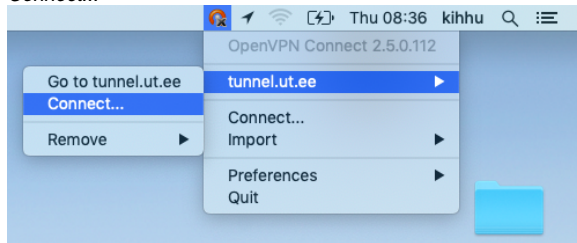

4. Press **Go**.
5. Click on the link that says *OpenVPN Connect for Mac OS X*, to download the installer for your device.
6. Launch the installer and follow the instructions on the screen.

## Establishing a VPN connection

1. To establish a VPN connection, you need to have OpenVPN Connect software installed on your computer.
2. Launch the OpenVPN Connect software, an icon will appear at the notification area.

3. Tehes ikooni peal parema hiireklahviga klõpsu, avaneb menüü, kust tuleb valida *tunnel.ut.ee* > *Connect...*

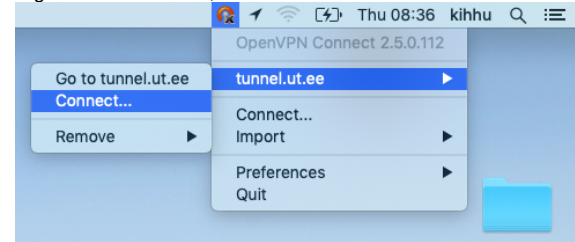

4. Sisesta *Username* ja *Password* ridadele vastavalt oma kasutajatunnus ja parool.
5. Vajuta nupule **Connect**.

## VPN ühenduse katkestamine

1. Aktiivse VPN ühenduse katkestamiseks tehke OpenVPN ikoonil parem klõps.
2. Vajuta nuppu **Disconnect**.

3. Right click on the icon, choose *tunnel.ut.ee* and then *Connect...*

4. Enter your username and password
5. Click on the button that says **Connect**.

## Disconnecting the VPN connection

1. To disconnect an active VPN connection, right click on the OpenVPN icon.
2. Click **Disconnect**.
